

## Your COVID-19 Results

### Your Information

Date of Service: 4/27/2020

Full Name: John Sample

Date of Birth: 01/02/1980

Gender: Female

Laboratory: Quest Diagnostics-West Hills

8401 Fallbrook Ave. West Hills, CA 91304

Medical Director: Sample Medical Director

### Your Test Results

Name	Your Result	Expected Result
SARS CoV 2 RNA (COVID19),	NOT DETECTED	NOT DETECTED/NEGATIVE

### Understanding your results:

A Not Detected (Negative) test result for this test means that SARS-CoV-2 RNA was not present in the specimen above the limit of detection. A negative result does not rule out the possibility of COVID-19 and should not be used as the sole basis for patient management decisions. If you are having symptoms, continue to follow isolation precautions. If you do not have any symptoms, it may be too soon to tell if you are infected. Continue to monitor for symptoms for up to 14 days after your last possible exposure.

The SARS-CoV-2 RNA (COVID-19), Qualitative NAAT Real-Time RT-PCR test is a qualitative multi-target molecular diagnostics test that aids in the detection of COVID-19. This test is intended to be performed on respiratory specimens collected from individuals who meet the Centers for Disease Control and Prevention (CDC) clinical and/or epidemiological criteria for COVID-19 testing.

Laboratory services provided by Quest Diagnostics.
